

# What's Going On

Tito and Freddie have been busy doing planned renovations as well as some projects that became possible because of the stay at home order that kept the Resort with very low occupancy for a few weeks this year. Gloria got busy ordering new durable furniture items to replace the ones that were showing wear and tear. They lasted a really long time, but it was necessary for them to be replaced.

The pool deck was getting really stained and worn to the point where pressure washing just wasn't cutting it. Tito and Freddie prepped and painted it and trimmed the pool and coping. It really looks fresh.

BEFORE

AFTER

## ...GOOD BYE LIGHTING CHAINS...

Tito and Freddie took the time to re-do the ceilings and get rid of the extension chains on the lighting fixtures and the old ceiling fans. Now everything looks proper and fresh.

# Bamboo to Driftwood

The bamboo hard goods looked good for a very long time, but age, wear and tear had taken their toll. Gloria found a great line of driftwood furniture that worked well with the soft goods and added a fresh and current vibe to the units.
